

kelash kumar

Backend Nodejs Developer

My name is **Kelash Kumar**, and I'm a student at **Mehran University of Engineering and Technology** in Jamshoro, Sindh. I'm really into building websites, and I've gotten pretty good at it! I know all about JavaScript, HTML, and CSS, and I'm also familiar with cool stuff like Tailwind CSS.

When it comes to web development, I specialize in the MERN stack, which stands for MongoDB, Express.js, React.js, and Node.js. These are the tools I use to bring awesome websites to life. I've worked on some really cool projects and even dabbled in using REST APIs to make my websites even more powerful.

But I'm not stopping there! I'm always learning and trying to improve my skills. Right now, I'm really interested in becoming a DevOps Engineer. I want to be a part of making technology even better and more efficient for everyone.
